Summary

Backend Software Engineer with 2+ years at noon, building high-scale distributed systems in Go and Python across catalog, discovery, and internal tooling domains. Delivered 20+ production features on high-traffic PLP/PDP services and built two internal platforms from scratch. 3× ACPC Finalist, Head of the ACPC Regional Scientific Committee, and coach to competitive programming teams across the region.

Experience

noon

Cairo, Egypt

Software Development Engineer 2 (Full-Time)

February 2024 - Present

- Owned PLP/PDP backend services in Go powering high-traffic product listing and detail flows
- Delivered 20+ production features across catalog and discovery domains with strong focus on scalability and reliability
- Reduced Redis CPU usage from **75%** → **25%** through caching and access pattern optimization
- Optimized Spanner queries, removing top-tier production bottlenecks and significantly reducing system load
- Built recommendation and catalog systems including product re-indexing and internal workflow automation tools
- Designed and developed a **Bigtable Studio with protobuf decoding**, enabling direct inspection and debugging of production data
- Built internal catalog tools platform for job management, indexing, and operational workflows
- Improved system reliability via redirect middleware, failure handling, and observability enhancements
- Migrated services from JavaScript to Go, improving performance and maintainability
- Introduced pre-commit standards and refactored shared utilities (caching, Bigtable helpers) for reuse and consistency
- Mentored new engineers and owned onboarding process with technical and domain training sessions

Skills

Languages	Golang, Python, C++, JavaScript, TypeScript, SQL, Java, C
Backend & Systems	Distributed Systems, Microservices, High-Scale Architecture, API Development, Caching, Background Jobs, Performance Optimization, Protocol Buffers
Databases	MySQL, Google Spanner, Bigtable, BigQuery, Redis, CVal Key
Cloud & DevOps	Google Cloud Platform, Docker, Kubernetes, Cloud Build, Skaffold, Bash, Shell, CI/CD
Messaging	Google Pub/Sub
Frameworks	FastAPI, Django
API & Testing Tools	Postman, Swagger, GitHub, GitLab
Monitoring & Observability	Google Metrics, Google Alerts, Cloud Logging, Sentry, Service Monitoring
Developer Tools	Git, Linux, Bash/Shell Scripting, pre-commit

Education

Suez Canal University

Bachelor of Computer Science and Informatics

Ismailia, Egypt

September 2019 — July 2023

- Grade: **Excellent with Honor**
- Achieved an "Excellent" grade for the Graduation Project - **Etlas** (github.com/Etlas-SCU/Etlas-Android)

Honor & Awards

Egyptian Collegiate Programming Contest

Top 50 nationally across 3 years: (23rd, 26th, 48th)

Arab & African Collegiate Programming Contest

Top 100 nationally across 3 years: (49rd, 56th, 76th)

Languages

- Arabic – (**Native**)
- English – (**Advanced**)
